

The SYNC Capstone Project Portfolio

30 Capstone Projects Conducted by SYNC Teams Across Virginia

Each SYNC team conducts a Capstone Project in which they identify a current challenge in their organization or community, and go to work on creating a solution.

30 SYNC Capstone Projects have been conducted by interprofessional teams from hospitals, health systems, medical practices, free clinics, rural health centers, community behavioral health organizations, pharmacies, and public health agencies.

Collaboration is key to the SYNC Capstone Project experience, as professionals collaborate across disciplines, and organizations collaborate across sectors.

As one result, SYNC has become a state and national model for generating clinical-community partnerships with public health organizations.

Click forward to view the topics and organizations for 30 SYNC Capstone Projects conducted to date.
