

# TRANSFORMING HEALTHCARE LEADERSHIP THROUGH TEAM-BASED LEARNING.

Today's healthcare teams face a growing need for interprofessional collaboration, creative problem solving, and impactful leadership training to drive organizational performance. SYNC is an innovative, team-based learning experience that teaches collaboration and leadership through hands-on problem solving.

“While we were a relatively close group, we bonded even more, which lets us more easily move issues forward and gives us a cohesive voice.”  
— CMO PARTICIPANT

## 4 SESSIONS

The core of SYNC's program is built around four hands-on workshops where teams learn about interprofessional collaboration and leadership from our nationally recognized faculty of field practitioners and our knowledgeable support staff.

Throughout the program, participants have access to consulting support and an online portal providing additional guidance, resources, and skills training. Participants can dive deeper into topics to achieve tangible results for organizations.

## 1 TEAM

SYNC is an immersive learning experience for healthcare teams of 2-5 participants, ranging from practice managers and CMOs to pharmacists and LPNs. Organizations are allowed to send more than one team, but each team must include a physician and registered nurse in addition to other clinical and administrative staff you choose to send.

## 1 CHALLENGE

Teams get the chance to put the latest developments in interprofessional collaboration, leadership fundamentals, and creative problem solving to use during the SYNC Capstone project.

Capstone projects allow each team to identify a **current challenge** within their organization or community and apply new concepts to implement a real world solution.

During the final workshop, teams present their project and share their learnings with the cohort.

**2019 SYNC SESSIONS**  
RICHMOND, VIRGINIA  
**8AM-5PM**
